

Premium POS Industry

People are always going to go shopping
A lot of our effort is just how we make the
retail experience a great one!

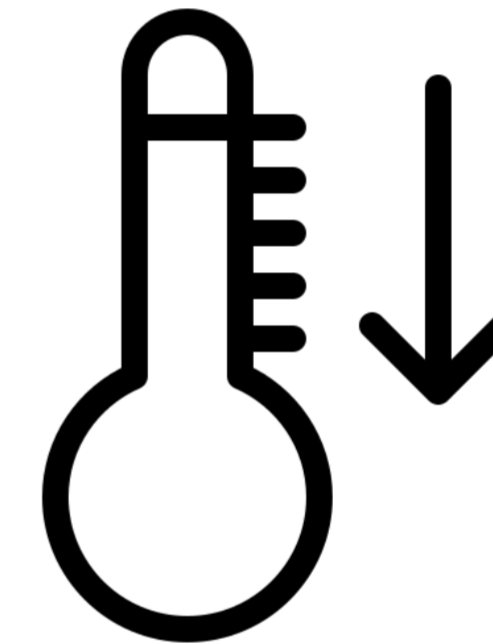

1. Stripes removed

02. "L Shape" removed
GLO/Vuse device products are
now easier to handle and
maximum available height
used.

03. As agreed
additional holes made for
better air flow and cooling

4. Edges curved as per request

Old frame
New frame

05. LED lamps covered for safety

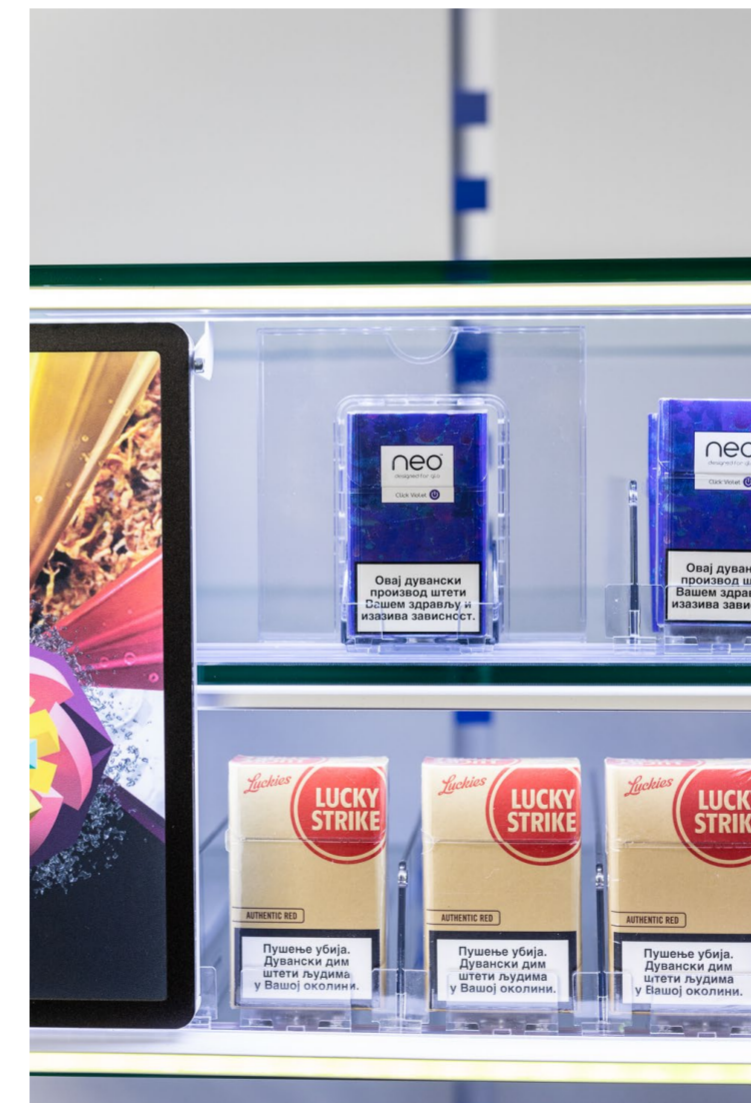

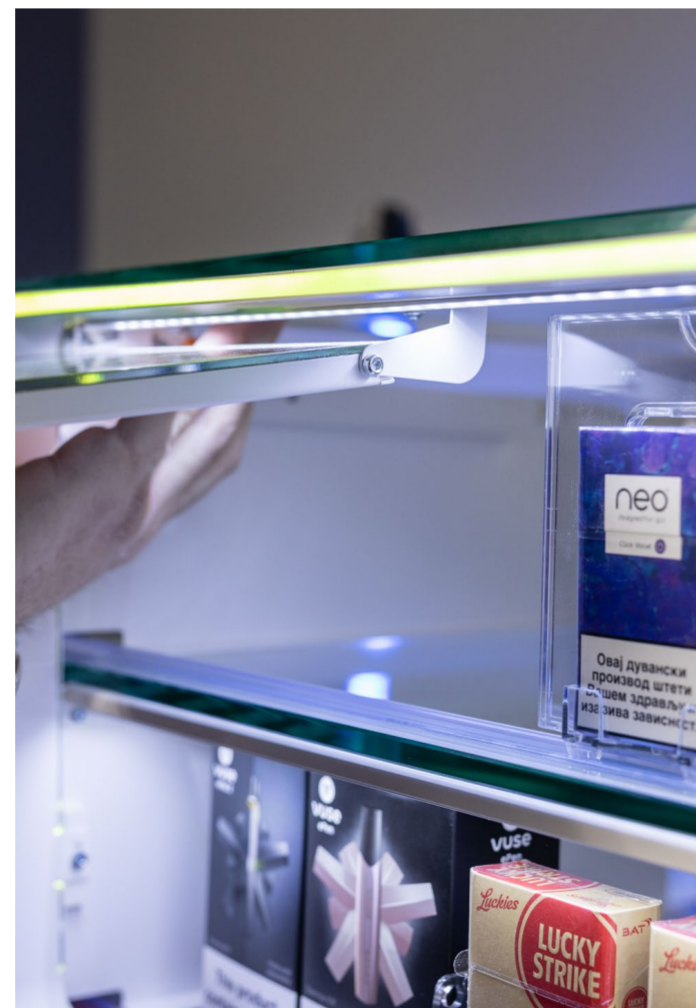

06. No visible black and red cables

7. Fixed flap and implemented with agreed gap.
Small flap one row can replace one big flap.

08. GLO tray + Commsmodule

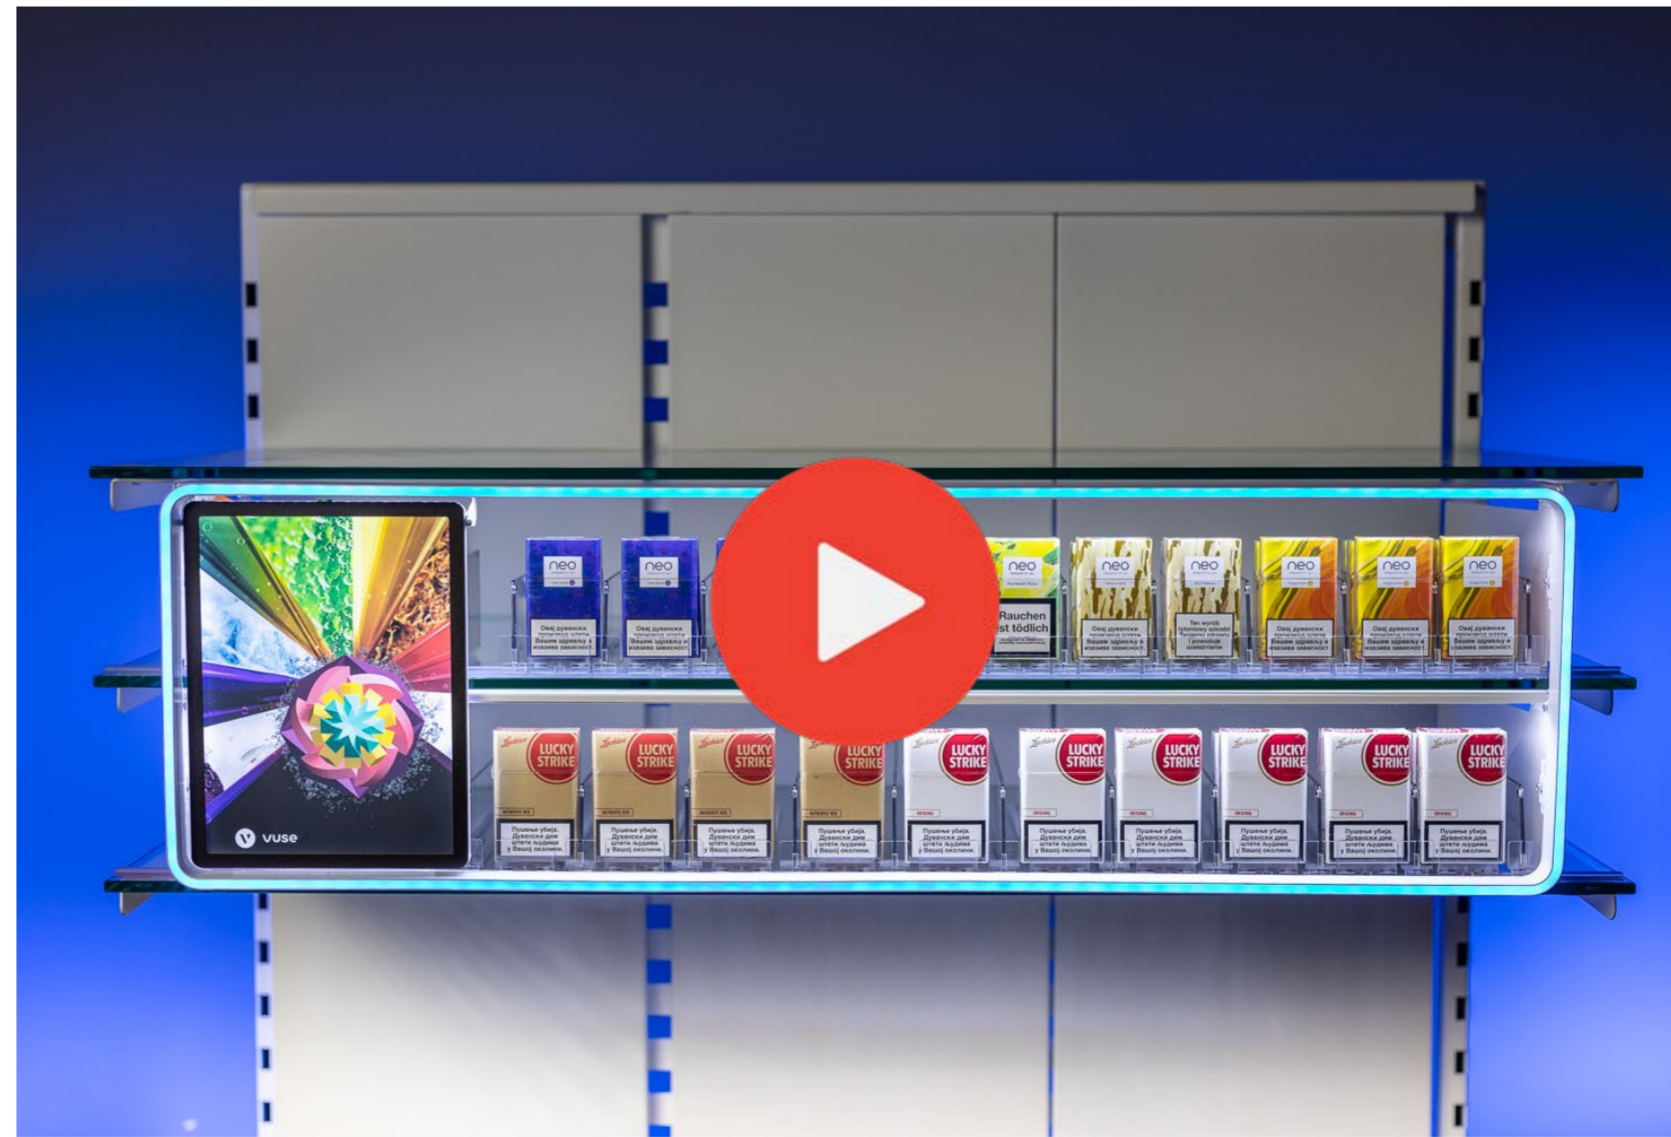

09. Packaging size reduced by 70%

RGB LED Stripes

- 10 or more colors available (TBA)
- No dimmers and ON/OFF switch removed
- Remote controller removed
- As agreed, hidden button implemented (photo)
- As already communicated "code" for switching ON/OFF will be implemented in mass production. (Please see video bellow)

ePod Caps Pack

Current ePod caps pack is 112mm, standard pusher height at front reduces total space by 11mm, which leaves only 4mm for handling the packs.

Due to very limited space, handling packs becomes difficult.

We recommend that we should maybe consider using similar solution that you had developed with angled pushers for VusoGo packs (photo).

Thank You.
